Director
San Juan County Public Library
80 North Main Street
Monticello, Utah 84535

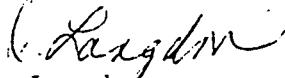

Dear Sir/Madam:

UNC Geotech of Grand Junction is nearing completion of a Remedial Investigation/Feasibility Study for the U.S. Department of Energy's inactive uranium millsite in Monticello. It is a requirement of the U.S. Environmental Protection Agency that an Administrative Record for the project--that is, a record of materials used in the decision-making process regarding remedial action--be located at or near the site and be available for public review.

I would like to inquire about the availability of space at the library for the Administrative Record for a period of about one year, beginning June 15, 1989. Approximately 15 linear feet of shelf space would be required to house the materials, which consist of books, manuals, and offprints. These documents would be considered reference materials and would not be eligible for circulation.

Please let me know as soon as possible at (303) 248-6562 if your facility has the available space and if there would be a fee for this service. Thanks in advance for your prompt attention to this matter.

Sincerely,

D. Langdon
